Summary

Experienced front-end engineering consultant, passionate about pragmatic, beautiful and efficient solutions to interesting problems, known for being a proactive problem-solver, successful entrepreneur and tech speaker.

Core Technical Skills

HTML5/CSS3 semantic code, JavaScript, Sass, Ruby on Rails, jQuery, Git, MongoDB, php, MySQL
Improving in: AngularJS, Chrome Dev Tools, Meteor, Tall Data

Professional Experience

PlayHaven (Vancouver, Portland)   Oct. 2012 – Mar. 2013
Front-end Engineer

- Developed a prototype of the new dashboard using AngularJS and Ember.
- Worked on adding features and fixing bugs in the existing Publisher dashboard.

Unbounce (Vancouver)   Feb. 2012 – Aug. 2012
Front-end Engineer

- Developed new app UI and new features using HTML5, Sass, JavaScript and Ruby on Rails.

Fabric Engine (Toronto, Montreal)   Aug. 2011 – Dec. 2011
Front-end Engineer

- Improved usability of Fabric development tools as part of open-source project.
- Created jQuery UI theme for the demos and custom designed Bullet Playground demo.

E-Code Studio Inc. (Toronto)   Feb. 2009 – Aug. 2011
Web Development Consultant

Front-end development for startups and web design agencies in Canada, US and UK.

- Attachments.me – coded new app designs into HTML5/CSS3 and implemented in RoR.
- Kik.com – developed mobile page for "Apps that use Kik" with strong focus on load time optimizations, reducing download size from 100kb+ to 13kb and http requests from 15 to 5.
- Managed a remote development team of five developers, completed 200+ projects for agencies.

Markup4U.com (Ukraine)   Sep. 2007 – Mar. 2009
Project Manager and Co-founder

Co-founded a design-to-XHTML conversion service company which was later acquired.

Education

B.Sc. Mathematics, Kharkiv National University (Ukraine)   2003 – 2007

Hackathons

- My project MoMA 2.0 received an honorable mention from a VC on the judging panel of Photo Hack Day 4 at Facebook HQ. Recap blog post (Apr. 2013).
- My hack Nikon vs. Canon won the Facebook World Hack Vancouver 2012 in "best use of 500px API" category. Source code on GitHub. First commercial application of Meteor.js (Sep. 2012).
- My project photoQuest.me received $1000 cash prize from Kik and $5000 in consulting services from Playground at Pixel Hack Day hackathon organized by 500px.com (Nov. 2011).
